

What is **RGE**  
 Santa Claus  
 going to leave you?

More oven cleaning?  
 More dishwashing?

Take care of  
 all that drudgery  
 with a Self-cleaning  
 Oven and Portable  
 Dishwasher from

**FRIGIDAIRE!**

Electric Range with  
 Self-cleaning Oven

model RSE-36P

**\$287**

Portable Dishwasher

model DWCDMR

**\$214**

Help from Frigidaire can free you to join in more of the holiday fun. Frigidaire made the Electric-clean oven for people who like to cook but hate oven cleaning. All you have to do is close the oven door and set the dial to "clean." In a couple of hours your oven will be sparkling clean, and the entire cleaning operation will cost you less than you are paying now for oven cleaning preparations.

Cook Master automatic oven control and automatic appliance outlet are great for holiday cooking because you can set them to start whenever you want. Handy minute timer with buzzer and clock make food preparation less hectic, too.

After everyone has enjoyed your great dinner, who's going to wash all those dishes? You could join in a lot more Yuletide cheer if you had a Frigidaire automatic dishwasher. This is the model that rolls

around for you—to the table, to the sink, or into a corner, out of the way.

There's no hand-rinsing because your dishes are scrubbed by jets of water from the top, bottom, and center. You only have to tip off large scraps and bones and place your dishes into the sturdy, cushioned racks. The dishes are sterilized, too, by washing and drying temperatures much hotter than you could possibly use with your hands.

Both the range (model RSE-36P) and the dishwasher (model DWCDMR) are available in colors at no extra charge.

Quantity is limited, so hurry to our Appliance Sales Department at 89 East Avenue, or call us at 546-2700, extension 2428. We think you should be free of kitchen drudgery this Christmas!

Open Tues. & Thurs. till 9, Sat. till noon.
