- ★ High Efficiency 5" Oval Speaker

Brighter

AccuColor is the most accurate color TV in RCA's history. More vivid. More lifelike. Every picture tube is computer-designed and has more radiant phosphors that deliver richer color. And RCA's Ferna-Chrome shadow mask prevents color distortion as the picture tube warms up. You get precise color that won't fade, shift or blur even after hours of continuous viewing.

Sharper

The AccuColor tuning system is built for pinpoint accuracy. All critical color controls are automatic. The system locks in the correct signal and stabilizes color intensity. And AccuTint—RCA's one-button automatic—gives you more natural flesh tones and consistent color on all channels.

Tougher TV

RCA has built reliable solid state devices into every AccuColor chassis. They replace many tubes and are the most reliable, most stable, most long-lived components in television today. AccuColor's built right.
