

## Want to Enjoy a Picture-Perfect Trip? Have Car and Camera Fully Inspected!

Before leaving on a motor trip, the average driver is likely to have his car inspected to make sure it is running properly and smoothly.

In the same vein, the camera depended upon for the vacation record should also receive the same careful inspection. There is nothing as aggravating or disappointing as discovering those fabulous pictures you thought you took are all a blur or nothing at all.

The easiest way to check the camera, especially if it has not been used for a while, is to shoot a test roll of film. If the pictures are satisfactory, you can be reasonably sure your camera is working properly. If not, take it to a dealer and have him check it.

### Photo Inventory

A profitable "before-leaving" photograph is one picturing the things you are taking with you. While a photo inventory will not prevent you from losing something, it is one good way not to leave things behind. Each time you move on, check the photo and see if you have everything. The same photo record could also be handy

## Most Tire Repairs Are Temporary, Reports National Safety Council

Careful drivers have their tire pressure checked regularly, as the National Safety Council advises. However, in the event of a flat tire, do you know how to have it repaired properly? Many of the tires supposedly receiving "permanent repair" do not meet safety tests.

The Council warns that external repairs on tubeless tires are good only for up to 100 miles of travel at speeds not exceeding 50 miles per hour. It is recommended that these temporary repairs be used only in emergencies.

For safe and permanent repair, a tire must be sealed from the inside. The use of an outside plug is only a temporary repair. Unless the tire is removed from the wheel, it is impossible to know if the inner layer is intact and not broken, damage which is critical to the tire.

Never "bleed" a tire, even if pressure builds up an extra six or more pounds after the tire is heated from prolonged use.

While it's possible to take good pictures from inside the car, it's better to get outside the vehicle, especially in a scenic spot. Even in the sunshine, using a flash bulb will heighten the effect of the photo as it eliminates shadows.

When filing an insurance claim for lost or stolen property,

Instead of "packing" your camera for the trip, keep it out of suitcases and handy for any scene that presents itself during the trip. Seeing a photographic scene is worthless if no camera is available.

### Facts on Film

A word of advice — film is perishable. Heat and humidity are particularly harmful and have the greatest effect on color film. In summer, don't place your camera or film in the trunk, glove compartment or on the rear deck. The best place for the camera is on the seat beside you. Extra film can be carried in a cooling chest.

### ANTENNAE UP

On a long trip, radio reception can sometimes become weak or full of static. Putting up the antenna will usually improve the quality of reception.
