## Here's a Most Revealing Test

One of the most revealing tests an experienced mechanic can make for you is a compression test, in which all spark plugs are removed and pressure readings are compared with specifications. This procedure helps your mechanic determine if the problem is in valves, rings or both. Such a test usually is part of a major engine tune-up, or may cost about \$5.00 or \$6.00 when done as an individual operation. A compression test can be the first step toward putting new life in the old car.
