ARGOSY RCA XL-100

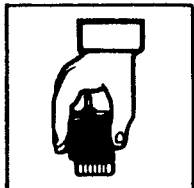

100% Solid State Color TV

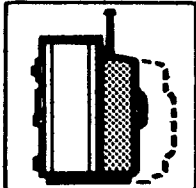

All Chassis tubes—a major cause of TV repairs—are out. Solid State components are in. They're cooler operating, last longer.

Tuning's a snap! The Argosy's tuning system makes color tuning easy. It features AccuMatic®, RCA's color monitor that automatically locks color within a normal range and still lets you refine color and tint manually.

Twelve exclusive RCA plug-in AccuCircuit® modules control most set functions. If repairs become necessary, AccuCircuit modules snap out for easy replacement.

The Argosy's wide-angle picture tube makes possible a cabinet depth almost 20% slimmer than with conventional picture tubes! Makes it more compact—easier to carry!

SO GOOD IT'S GUARANTEED
