

Paul Ianello, left, and Deno Bruce will be among the thousands of scouts selling Scout-O-Rama '73 tickets.

Scout-O-Rama Slated

The annual Boy Scouts show gets bigger every year. For that reason, there will be not one, but two Scout-O-Ramas this year, at the same time, but at different places.

The shows will take place on May 19, from 10 a.m.-10 p.m., at both Aquinas Stadium, and the Monroe County Fairgrounds.

With the theme "Scouting's More Than You Think," scouts from most of the 653 Otetiana Council Units of Monroe County will participate in up to 197 scouting activities.

As expected, there will be the usual exhibits on camping, first aid, and conservation; but there will also be such exotic (for scouts) demonstrations as astronomy, journalism, fencing, and plumbing.

Be prepared. Many of the 19,000 scouts in Otetiana Council have already hit the streets selling tickets for Scout-O-Rama '73.

General chairman for Scout-O-Rama '73 is Frederick Ray, president of Rochester Savings Bank.

Gates-Chili Right to Life Group Will Initiate Pro-Life Masses

The Gates-Chili Right to Life Committee will initiate a program of monthly Masses for the protection of the unborn and the preservation of family life.

The first Mass will be held in St. Mary's Church, Scottsville, May 21. The second Mass will take place in St. John's Church, Spencerport, on June 12.

Other Masses will be announced at a later date, as soon as Masses and guest speakers can be arranged.

Further information concerning the times and speakers at the above-named churches will be made known at least a week before the Mass takes place.

Since the Courier-Journal's recent mention of the availability of Circle of Life Bracelets, the committee has sold at least 25 of them. Anyone wishing to buy a \$3.00 bracelet may do so by writing to the Gates-Chili Right to Life Committee, PO Box 8901, Rochester, N.Y. 14624, or by calling George Goodwin, 247-2052.

**Drive out to Brookwood
any day except
Fridays and Saturdays
We're open 10 a.m.-4 p.m.**

We'll tell you a fascinating story that sounds like pure H.C. Wells. It's about the atom. How it splits. And how the energy from the splitting of the atom (a process known as nuclear fission) is used to produce the heat that is used in the generation of electricity.

Animated displays with taped narrations graphically illustrate the generation of electricity, the structure of the atom and the occurrence of nuclear fission. One of the most exciting exhibits depicts the operation of the nuclear reactor that is used in RG&E's Ginna Plant.

A narrated flow diagram shows you how heat from the nuclear reactor produces steam to operate the turbine that drives the electric generator.

Films, slide shows and highly trained staff members help you further understand nuclear energy and how it is used at Ginna.

But the most meaningful part of your visit to Brookwood, perhaps, will be your conversations with the staff members. They are ready to answer any question you have about Ginna and nuclear power plants in general. Questions like—What are the advantages of nuclear power plants? Are they safe? What about so-called thermal pollution?

Brookwood is located east of Rochester on Lake Road in Ontario, N.Y. You can visit it at no charge any time from Sunday through Thursday between the hours of 10 a.m. and 4 p.m.

During the month of April you can see a preview of your visit to Brookwood when you stop in at our Consumer Information Center on the Main Floor at 89 East Avenue. We're open Monday through Friday from 8 a.m. to 5 p.m., Tuesday and Thursday to 9 p.m., and Saturday from 8 a.m. to noon.
