RCA 100% SOLID STATE COLOR TV

RCA XL-100'S HAVE ALL THESE QUALITY FEATURES!

100% solid state. RCA XL-100s are 100% solid state. Most set functions are controlled by RCA's 12 plug-in AccuCircuit modules. They're designed to keep cool, last longer, and be easy to service.

No chassis tubes to burn out. Chassis tubes are a major cause of TV repairs. Tubes get hot and weaken with age. RCA XL-100s don't have chassis tube problems because they don't have chassis tubes.

A sharp, bright picture. Every XL-100 console and table model has RCA's black matrix picture tube. You get the kind of sharp, vivid color you'd expect from the people who pioneered color TV.

Simple automatic tuning. RCA XL-100s have a fiddle-free tuning system — with a flexibility feature most other sets don't have. RCA's Accu-Matic color monitor makes it simple to custom tune color to your individual preference — and keep it that way. Automatic Fine Tuning locks in the correct picture.
