**ALL IN THE FAMILY**

*Sarah Child*

It was Sigmund Freud's contention that people should not try to make important decisions the same way they resolved non-crucial matters.

Small matters, he said, should be weighed, pro and con and thoroughly analyzed before coming to a decision.

Important changes in one's life should not be scrutinized in this manner but rather the person involved should rely on instinct or gut feeling!

Keeping this admonition in mind I've come up with a few examples in both categories to give you an idea of what constitutes important as compared with non-important issues.

First the non-important decisions, which remember, should be carefully thought out:

- Choosing an orthodontist.
- Buying a house.
