Polka dot decor 'spotted'

Something new, not seen very often in decorating in the past, is polka dots! These have been spotted in more and more interiors. And dots of all sizes work.

A personalized philosophy behind use of colors depends upon an individual's interests and activities, rather than just what looks nice. The colors chosen should reflect the things that matter in his or her life. If a person is proud of his plants, then color around them in leafy greenness and flowering blossoms.

So look for clear, bright tones, a sunny tropical look,

lots of texture and pattern, with a continuing interest in earth tones. The message for 1974 is to be imaginative, be individualistic, and don't be afraid to experiment with bolder color.

BUTCHER BLOCK LOOK

The butcher block look, a fashion favorite in the home since moving from the kitchen to the living room and den, can also serve as a theme for the bedroom.

Furnishings such as desks, chests, hutches, bookcases, bunk and chest beds, are available finished in the butcher block pattern.
