

Red Cross Says 'Don't Get Hooked'

That time is here again, so the American Red Cross is offering suggestions to keep fishermen from hooking themselves and others, or suffering more tragic accidents, as they wade into the fishing season.

To help prevent drownings and other accidents among the nation's amateur Izaak Waltons, the Red Cross recommends certain pointers. First, all fishermen should know how to swim, know how to give first aid, and remember to carry a first aid kit with them on fishing trips. If you go on a fishing trip alone, leave word where you will be and when you plan to return. However, it is much safer to fish with a companion.

Fishing enthusiasts should listen to weather forecasts and not go on the water when threatening weather is forecast. Also, they stay away from water where there are swimmers, water skiers, and skin and scuba divers.

Fishhooks can catch anglers as well as fish, so fishermen should carry needlenose pliers, wire cutters, and a pocketknife in tackle boxes. Always keep hooks in covered containers. When casting, anglers should make certain there is room to do so without hooking someone else. Always look before casting and use an overhead cast while in the boat with others. If you snag yourself deeply with a hook, cut off the line, bandage the wound, and go immediately to the nearest doctor or hospital. Don't risk further injury trying to remove a deeply imbedded hook.

Learn how to hold a fish properly while extracting a hook. Many species of fish have sharp teeth or fins that can cause painful hand wounds.

Along the shore, wade cautiously to avoid slipping on hidden rocks or stepping unexpectedly into deep water. While fishing from the bank in snake-infested country, watch where you step and sit and what you touch. Wear high boots.

When fishing in channels or rivers, never tie your boat to channel buoys, which are traffic markers and must be kept clear. Never stand up in a boat while fishing, and always have a properly approved personal flotation device for every person.

SPECIAL OFFER Meet the ESKA Gas-Savers!

SPECIAL SALE PRICES
5.5 HP . . . \$200
9.9 HP . . . \$410

No need to let the gas shortage stop your fishing enjoyment. ESKA outboard fishing motors . . . the gas-savers . . . are your answer. Designed to the special needs of the fisherman, ESKA offers you big performance with low horsepower and fuel consumption. In fact, you get an entire morning's fishing in on less than a gallon of gas. Check the features . . . check the price.
