Star MARKETS

ANOTHER CONSUMER SERVICE FROM STAR MARKETS

Star Markets, in conjunction with the observation of National Weights & Measures Week - March 1 thru 7, is pleased to publish this Metric information, thru the courtesy of the Monroe County Department of Weights & Measures, Louis Romano County Seal.

10 BASIC UNITS ARE ALL YOU NEED TO KNOW ABOUT METRIC

Metric is based on the Decimal system.

The metric system is easy to learn. For use in your everyday life you will need to know only ten units. You will also need to get used to a few new temperatures. Of course, there are other units which must be used and need to be known. There are seven basic units with which you are most familiar: those for time and electricity are the same as you use now.

BASIC UNITS

METER: a little longer than a yard (about 1.1 yards)

LITER: a little larger than a quart (about 1.06 qts.)

GRAM: about the weight of a paper clip

OTHER COMMONLY USED UNITS

MILLIMETER: 0.001 meter

Centimeter: 0.01 meter

KILOMETER: 1000 meters

MILLILITER: 0.001 liter

HECTARE: about 2.5 acres

TONNE: about one ton
