

Around Rap Around Rap Around Rap Around

What human weakness do you think is the predominant cause of society's problems?

ST. AGNES

Rose Schwartz, junior, Student Senate

"Mistrust. In today's society people have become less open to other people around them. It's becoming a closed society because people have become so distrustful of their neighbors. The harm will be the growing distrust which will lead to not helping your neighbors."

Marianne Greco, junior, Student Senate officer

"Greed because people want things for themselves. They're out to get what they want and will do anything to get it. A cause could be the corruption in politics and business. Greed is becoming an accepted thing. You get one person who wants to follow the rules and he gets walked on so you have to play the game."

Mary Beth Conley, senior, Class president

"Greed influences everybody. It seems more people are out for their own good rather than looking out for others. I think it's the way they're brought up. They've been handed everything and they feel the world still owes them this. Greed is taken for granted by society. People feel it is the thing to do to get what they want."

Denise Ducci, senior, Vice president of Student Senate

"I think so many people are trying to get ahead they're not remembering the human aspect of life. They tend to step on other people to get what and where they want. It's a combination of greed and ignorance. They may not intentionally be greedy but they're so intent on getting what they want they forget other people."

Kathy Guyette, senior, Martial Arts Club

"Greed. People are too busy trying to make money and getting what they want materially and forgetting the human side of life. Keeping up with the Joneses is the cause. If the person next door has a Cadillac you have to get one better. It's too bad it's that way. As long as there are people there will be greed. People should be more human and care for others and forget their monetary values."

Karen Conway, senior

"I think greed is definitely because most people are unhappy if they can't have what they want, like a big house. I think wars are a result of greed because governments want more land and power. I think greed is on the increase. More people are being educated and see the things they want and go after them and then become more greedy. Both power and materialistic greed are increasing."

Theresa Kusak, junior, Monroe County Youth Board

"Greed is the cause for much of the unhappiness in society because people today do things just to get what they want and will go to any lengths to get it. And from this I think all the other problems result. It's the basis for unhappiness. I feel it is accepted in society but I personally feel there are other ways of achieving your goals without hurting others. We're in a materialistic world and it's up to the individual to curtail his greed."

Bridgette Burch, senior, Class vice president

"Greed because everyone wants everything. The most important things today are the materialistic things rather than the person's happiness and this is destroying the world because everyone is stepping on everybody else to get what they want. People are beginning to think that in order to survive and to make it, it is alright to step on anybody you have to. The cause I think is the people with the money have the power and the people that don't have these things see that it is good and feel if they have to have material things to be happy, they'll do anything to get them."

Garage Sale Scheduled

'Come one, come all!' is the slogan for the Aquinas Institute Garage Sale which will be held in the gym on Saturday, April 2 from 9 a.m. to 4 p.m. and Sunday, April 3 from 11-4 p.m.

Toys, records, jewelry, dishes, TV's, books, furniture and glassware are some of the items which will be on display. There also will be a baked food sale. Articles may be donated to the Sale by calling 254-2020 or brought directly to the school during the week of March 27.

'Fiddler' At Olympia

The Greece Olympia High School Drama Department will present Fiddler on the Roof on March 31 - April 1-2 at 7:30 p.m. in the school auditorium at 1139 Maiden Lane.

All seats are reserved. Call 621-1500 for reservations.

In Search Of Science

St. Agnes High School chemistry and physics classes have the opportunity for an in-depth look into the sciences through field trips and special sessions at the school. They are able to take advantage of lecture invitations from the University of Rochester.

On March 15, the classes were visited by Dr. Mancuso of the Physics Department at Brockport State University who demonstrated many facets of the science world.

On March 17, students attended a symposium on "The Mixed Bag of Tomorrows Energy" conducted by the Rochester Museum of Arts and Sciences. A portion of the seminar was devoted to explaining the nuclear power energy presently used by Rochester Gas and Electric.

Frosh Romans depict the era of Julius Caesar; David Pullano, Chris Taft and Bernie Lynch.

Firsts at DeSales

Geneva DeSales was a busy place during March with two new projects; celebrating the Ides of March and presenting a Career Day.

Mac Spelley's freshman English class entertained the student body with Shakespeare's Julius Caesar. Their hour and a half program received a standing ovation from the audience and was given a high plaudit by upperclassman Jody Lavin. "It was great," she exclaimed.

That same evening the actors presented selections from Shakespearean plays for the public.

The Career Day was sponsored by the Student Council, under the direction of moderator Ann Smith, and coordinated by Cathy Golden, student representative.

According to Cathy, two months work went into the

Winner!

Debbie Stermer, a student at Notre Dame High School, was the recipient of the Winner's Circle \$5 for the week of March 16.

project; surveying student interests, deciding on the various professions to be included, contacting the career representatives, and formulating student schedules to coincide with the various career presentations.

Cathy indicated there had been good response about the project from both the student body and those invited to participate. "Hopefully," she mused, "it will become an annual event."

Mac Spelley following the lines of his Roman orators.

Among the careers the students were able to investigate were medical, architecture, business, communications, music, photography, and engineering.

In compiling the surveys on student career interests Kathy observed that the health related fields seemed to be very popular.

Cathy was the guiding force behind the Career Day. She is also on the school's yearbook staff and plans to enter Pre-med school, hopefully at Cornell University.

Aspiring athletes at Aquinas Institute have a strange way of working out as they take to the field in preparation for summer sports.
