Do you think there is an energy crisis?
NOTRE DAME

Bill Kuttenkuller, sophomore, wrestling . . . "Yes, but Carter's plan won't help because people are going to buy gasoline any way. In Philadelphia where subways, trains, buses and subways are on strike, many more people are having to use cars. That doesn't help the energy crisis. I think they should start going to nuclear energy but the problem with that is the waste material."

Donna Sheehan, junior, cheerleading, Spanish Club . . . "Yes, by all the things the president says, like keep our heat turned down. Carter's program will help. He started it because we don't have any drastic problems now and he wants to prevent them. I don't think we'll have any drastic problems if we do what he says. People should double up in cars and keep their heat down; that will help a lot."

Bill Knowles, senior, Yorkers Club . . . "I most definitely think there is an energy crisis. The most important thing the American public must realize is that we must conserve energy for the purpose of strengthening our individual futures and strengthening the future of America. Aside from the fact that we are confronted by the energy crisis and aside from the necessity for conservation, it is necessary that we continue to search for renewable and efficient sources of energy, such as wind, solar and geo-thermic energy."

Phil Weingart, senior, Student Council president . . . "Yes, because of the waste. I work in the cafeteria and I see tons of waste everyday. If there's not an energy shortage now there will be one pretty soon. From what I've seen in the reactions to Carter's speech I don't think people are going to crack down on their oil and gas use. I think we need to resort to electrical, solar and nuclear power; that seems to me to be the only solution to the problem. I don't think Carter's tax proposals will help; it'll only cause more of a problem. I think it's a waste. He said himself that we're going to run out of oil eventually. There should be a better way to control people than taxes."

Ira Heyward, junior, football . . . "Yes, from listening to President Carter and to other people around me talking of how we don't have any gasoline; how we don't have any oil to heat our homes, leaves me to believe that we are at a high point of energy shortage. I think that while we are being told to conserve our energy it seems like we are also wasting it. By this I mean, for example, the oil spillage in the North Sea which is not only killing our wildlife but is also wasteful."

Lynn Tessier, freshman, Student Council . . . "Yes, because all the prices are going up and everyone is trying to cut down on gas and electricity to save money. I think that if the prices are high, people will lose their jobs. It'll just make it harder on us. We won't have the money to buy the things we need. I don't think Jimmie Carter's plan will help. People can't afford to pay for big cars because of the prices and they're going to need one if they have a big family."

Mary Beth Morgan, freshman, class vice president . . . "Yes, because why else would the prices be so high and everybody be in such an uproar. I think the president is doing a good job, like putting a tax on high priced cars. We ought not to waste as much energy as we've been wasting. A lot of crude oil has been wasted from the ships in the ocean. I think we should resort to other means of energy."

Julie Fennell, sophomore, basketball . . . "Yes, because everybody has to ration their electricity and gas of high prices and a lot of people are out of jobs. People who can afford to buy the big cars can pay, but people with big families need to have it cut down for them. There won't be as many people driving if the gas is so high."

AQUINAS
Friday, May 13 — Class of 52 reunion; Bean and Feed.
Tuesday, May 17 — Bloodmobile.

BISHOP KEARNEY
Thursday, May 12 — Parents' meeting, auditorium; 8 p.m.
Friday, May 13 — Mass, 1:45 p.m.; Junior Prom at Oak Hill, 6:30 p.m.
Saturday, May 14 — Auction, cafeteria; 8 p.m.
Tuesday, May 17 — Kings Guard dinner, Carriage Stop; Parents Club mailing, 7 p.m.; glaucoma clinic, 7-9 p.m.
Wednesday, May 18 — Franciscan vocation seminar.

DESALES
May 13-14 — Senior play.
Saturday, May 14 — Varsity Club car wash; 10-2 p.m.; Salesian newspaper drive; 9-12.

MCQUAID
Monday, May 16 — English advanced placement exam.
Tuesday, May 17 — Physics and American History advanced placement exams.
Wednesday, May 18 — Mini course day.

NAZARETH
May 11-13 — Student Council election campaign.
Thursday, May 12 — Junior assembly; 8:35 a.m.
Saturday, May 14 — Junior Prom; Holiday Inn, Ridge Road West.
Monday, May 16 — Press Day at St. Bonaventure; Class Officers meeting; Alumni meeting, 8 p.m.
Tuesday, May 17 — Assembly, Student Council speeches; 8:30 a.m.
Wednesday, May 18 — Student Council speeches; 2:45 p.m.

NOTRE DAME
Thursday, May 12 — Math placement test.
Friday, May 13 — St. Bonaventure Language Day.
Saturday, May 14 — Spring festival.
Monday, May 16 — English advanced placement test.
Wednesday, May 18 — Future Secretaries banquet.

OUR LADY OF MERCY
Thursday, May 12 — Parents' Board dinner.

ST. AGNES
Friday, May 13 — Shareholder's Day; 12:30 p.m.; Student Sendate dance, 8 p.m.
Saturday, May 14 — Junior Prom, Rochester Club.
Monday, May 16 — Faculty Advisor Board meeting.

The Flying Adventurers

BY CATHY NESSER
Bishop Kearney

One way to look at the world from a different dimension is to look at it from 2500 feet in the air. Peter Hasby, a senior at Bishop Kearney High School has found that flying is a great way to meet many new people and to look at the countryside.

When he was younger, Peter was very interested in airplanes and would ask his mother about them. He decided that when he was old enough he would take flying lessons. At sixteen he started lessons at Monroe County Airport. He took each lesson as he earned money to pay for it from his paper route. Peter's lessons lasted over a period of two years. He received his private pilot's license in August of last year.

On one Saturday, he took

Brother William Stoldt and me flying. The controls on the Cherokee Cruiser looked very complicated but Peter said that it was just a matter of getting used to them. To prove his point, he showed me how to keep the wings level and how to make the nose go up and down. Then he told me to fly it on my own. It wasn't quite as easy as it looked. The control panel was up to my

forehead so I couldn't see out the window to control the nose so I had to watch the artificial horizon to find out our position in the air.

Brother Stoldt relaxed in the back enjoying the view while I mastered the controls. He suffered a moment of panic when Peter announced that he was going to sleep and leave me in control.

Brother Stoldt smiles confidently as Peter checks final details for flight. Peter is a Regents Scholarship winner

Peter says that learning to pilot a plane is not difficult. It is just a matter of getting used to and developing motor skills. The most important thing is to be alert. Once a person has flown a few times, he or she learns to relax and can enjoy the ride.

Everything looks very different from thousands of feet up. I could see that we were very far off the ground, but it looked and felt as though we were suspended in air. When Peter pointed out Bishop Kearney High School I was very surprised that we had travelled so far in such a short time. I asked him about that and he agreed that one could not feel the speed. He said, "The best description of flying I can think of is that you seem to be a giant walking slowly across the countryside."

That's Entertainment

The week of April 25 was Arts Week at Our Lady of Mercy High School. The days were filled with all types of artistic entertainment by the students as well as outside performing groups. During the school day the students, in their free time, could relax in the auditorium and enjoy the performances. Above, Mitzi DeRose and Alynn Magguli join up in a duet, while below, Mercian Margaret Cahill and Mike Toria, members of Deluge, sing out loud and clear.

Sewing And Saving

Nazareth sophomores and juniors from Sister Marie Lawrence's Management Class began a new project. Combining their skills of managing money and of clothing construction these students are producing a garment at the lowest possible cost. They purchased remnants from the Home Ec department, used old or borrowed patterns and started constructing inexpensive clothing.

They are making halter tops, shorts, shirts and vests from a variety of materials;

jersey, double knit, and crinkled muslin and will model their creations at a fashion show scheduled for May 23.

Naz Reps

Nazareth Health students, Gina Cordaro, Theresa Frazer, Joanne Fagnoli and Margaret Woodward represented their school at the Drug and Alcohol Council luncheon meeting held today at the Rochester Chamber of Commerce.
