Thursday, June 2—Section 5 Tournament; check daily newspapers for teams, locations and times.
Saturday, June 4—Section 5 Tournament.

Remembering the Missions

BY JOAN M. SMITH

Geneva DeSales' gym was a beehive of activity the week of May 16 as it was converted into a carnival hall for the school's Mission Day. Sister Sheila Hanley, business teacher, along with her student helpers put together game booths, hung decorations, and made the refreshments, carrying on a happy banter through it all.

The event began with a Mass said by Father Peter Deckman of Newark who has spent nine years with the missions in South America. It was his message about it taking courage to be a Christian which stamped this year's Mission Day with significance.

The festivities in the gym opened at noon on Friday, May 19 when the DeSales students descended on the booths. Elementary school children joined them in participating in games including ping pong, dart throw, ring toss, and over and under. For the hungry, there was a pizza booth in full swing.

Sister Sheila anticipated a successful venture and credited the efforts of her co-workers, Sisters Mary Lester and Margot Mann, as the reason. According to sister the proceeds would

DeSales girls had their hands full with stuffed animals. Helping out with the Mission Day were Joan Marsh, Barb Conley, Maureen Hurley, Monica Smead and Eileen Kayrol.

be dispersed to numerous missions around the globe; to the Sisters of St. Joseph missions in Selma, Alabama; to Father James Hastings, a graduate of DeSales, now with the missions in Japan where he said one-fourth of 1 per cent of the population is Catholic; to Father Frank Taney, a graduate of Geneva High, and in the Philippines; to Father Peter

Major with the missions in Borneo who is a brother of faculty member Sister Ann Emperor; and to Father Van Hager with the Ethiopian missions and a brother of Ann Smith, chairman of the Science Department.

The students were thanked, personally, for their thoughtful generosity by Father Hastings who visited DeSales shortly before leaving for his mission in Wakayama, Japan.

"Good stuff!" declared David Maher after tasting the results of the refreshment crew's recipe.

Dan Ninestine, Jr., and classmate David Eddy stock up on the soft drinks for the crowd.

Faculty had just as much fun as their students in preparing for Mission Day. Here, Sisters Margot and Sheila oversee the construction of booths.

Science Explored

Nazareth upperclassmen participated in the Science Exploration Day held at St. John Fisher College, on Wednesday, May 25. This annual science show, comprised of professional exhibits, stage shows and student projects was sponsored by the Central Western Section of the Science Teachers Association of New York State.

The program which was open to area students during the day and the general public in the evening aimed at educating the public in regards to recent scientific

achievements, to make them aware of career opportunities in science, to disseminate basic scientific information in the area of health, the environment, technology, natural and physical science and to create an awareness of the need for scientific education at all levels.

Over 100 professional exhibits provided learning about glass blowing, lasers, photography, equipment, fiber optics, energy production, and conservation, spectroscopy, chromatography, space age engineering, ecology, and nuclear power.
