Sport Program Allowed by State

Selection Classification, a program mandated by Dr. Michael Willie, director of the New York State Physical Education, Fitness, Health, Nutrition and Safety Services, has been established at Our Lady of Mercy. It allows seventh and eighth graders from Catholic grammar schools to participate in Mercy individual sports like gymnastics, swimming, track and field, and tennis. They can play on JV or varsity level depending on their capabilities.

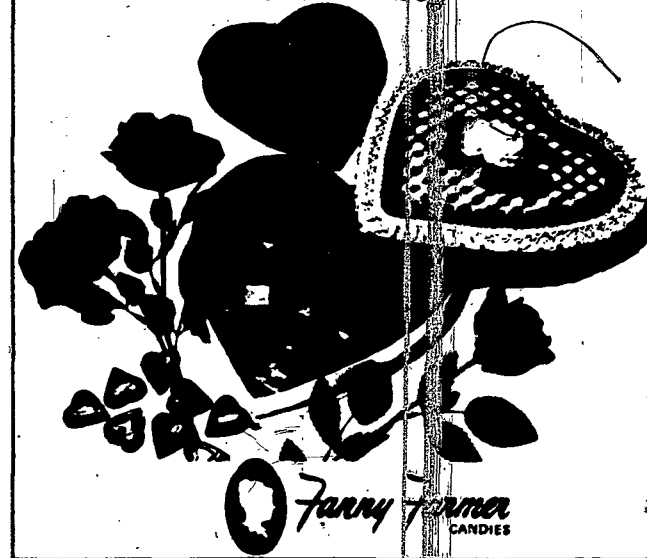

Before participating, the girls must first pass a physical

exam, either at Mercy or at their own school, and give a letter of intent to Sister M. Bonaventura, principal, stating they plan to attend Mercy their freshman year.

According to Mrs. Elaine Larsen, coordinator of the program, Mercy is the only Catholic high school participating in the project which has already been instated in several public high schools in Rochester.

Registration at Mercy will begin in March. For more information call Mrs. Larsen at school, 288-7120.

Announcing Rochester's first medical practice specializing in the Management and Treatment of Pain

Timothy L. Stern, M.D.

Important discoveries have been made recently about how the human body responds to pain. Reports to the National Institutes of Health and elsewhere have described safe, new ways to control severe pain.

As a result, a medical specialty has emerged that treats pain as a disorder in itself, in addition to providing medical care for other health problems.

A range of techniques has been found effective in managing acute,

chronic, and intractable (uncontrolled) pain from such problems as cancer; rheumatoid arthritis and bursitis; sinus conditions, whiplash, lower back weakness, common athletic injuries, and migraine headaches. Pain management practices have also helped people withdraw from smoking or drug addiction, and control appetite.

For more information, telephone Rochester Pain Medicine, 223-0464.
