THOUGHTS TO CONSIDER

EDWIN SULEWSKI
FUNERAL DIRECTOR

What is the Difference Between a Memorial Service and a Funeral?

A memorial service is usually held without the body being present. Frequently the body is buried or cremated first. A funeral on the other hand is a ceremony while the body is still present. Having the body present helps us face the reality of death and permits expressions of emotions. While viewing the body may not seem pleasant it helps us with a reality which must be accepted. Additionally the body's presence elicits emotions which need to be released in an honest and healthy manner. After a meaningful ceremony in the presence of friends the body is buried or cremated.
